The use of SecurTrac<sup>™</sup> is beneficial to staff members with different roles. Appropriate staff can access change histories and identify potentially hazardous events. SecurTrac<sup>™</sup> can assist in enabling compliance needs for regulated companies.

### For CIO's and MIS' - Accountability

SecurTrac<sup>™</sup> audits all events so that questions (who, what and when) can be answered easily. Protect your company's knowledge assets. Comprehensive audit logs make it possible to hunt for information and identify unauthorized attempts to access data or other intentional actions.

# For the Developer - Plug-in Auditing

SecurTrac<sup>™</sup> is a ready-made audit trail system which helps shorten the application development cycle immensely. With the deployment of SecurTrac<sup>™</sup>, developers are no longer required to write audit trail functions for individual applications.

# **Server Requirements:**

- Supports Domino 5.0.x and 6.x running on Windows NT/2000/2003, Sun Solaris, AIX and AS/400 - iSeries platforms
- Minimum 32MB of memory above current Domino service requirement
- Minimum 50MB of free disk space

# **Administration Client**

Notes Client 5.0 or above

# **IBW** Business Partner

### For Quality and Security Managers -Traceability

SecurTrac<sup>™</sup> enables Security Officers to spot irregular movements of confidential information. Life-cycle tracking allows the tracing of electronic information and e-mail activities instantly in the Domino environment.

### For System Administrators -Instant Alerts

SecurTrac<sup>™</sup> enables easier management of Domino directories for System Administrators. It tracks, in real-time, all object changes within the Domino environment. It monitors the settings and tracks malicious events.

# You needed it yesterday. Get SecurTrac<sup>™</sup> today!

Download, install and configure in as little as 20 minutes.
