ExtraFax
ENTERPRISE FAXING

Great New Features

DOMINO 10 READY

Native installation of ExtraFax now supported on Linux
Now you can install ExtraFax natively on an IBM Domino server running on a Linux platform. Workstation no longer required!

Integration with SAP
SAP integration with ExtraFax to easily send faxes directly from SAP using SMTP. Also route incoming faxes from ExtraFax to SAP. Import user preferences and inbound routing information from SAP.

Port Management Console
Incorporate a management console where channel real time output can be accessed without the need to have access to the server operating system.

Remote Port --- (Remote Hardware Port)
Fax/SMS/MMS hardware devices can be installed on remote computers, providing the ability to have a separate fax server and Fax/SMS/MMS device platforms. The Remote Port feature will give you the ability to use ExtraFax that is natively installed on a Linux server, while using Fax/SMS/MMS hardware devices that are e.g. installed on a Windows platform server.

Enhanced Administrator Interface
The ExtraFax 8 post office database includes enhanced navigation and layout to help improve Administrator productivity.

3 of 9 barcode generator
In addition to being able to create QR Codes, now you can create 3 of 9 bar codes directly within ExtraFax, so that they can be used with your fax documents.

Built-in Probes & Alerts to monitor ExtraFax server status
Option to configure various different alert types (Task Status, Fax Hardware Online/Offline, Outbound, Inbound queue thresholds, Error Messages) all with e-mail notifications.

Reminder Notification for pending Fax jobs that must be approved
When the workflow approval feature in ExtraFax is active, multiple reminder notifications will be sent to individuals who must approve pending fax jobs.

Cover Page Wizard and Preview.
Using a Wizard style interface, create cover pages seamlessly. End users and administrators can also preview the available ExtraFax cover pages before they are used.

SMPP Support and using Skype to send SMS messages
Send and receive SMS messages using an SMPP connection with your Telco Carrier. Send outbound SMS messages using Skype.
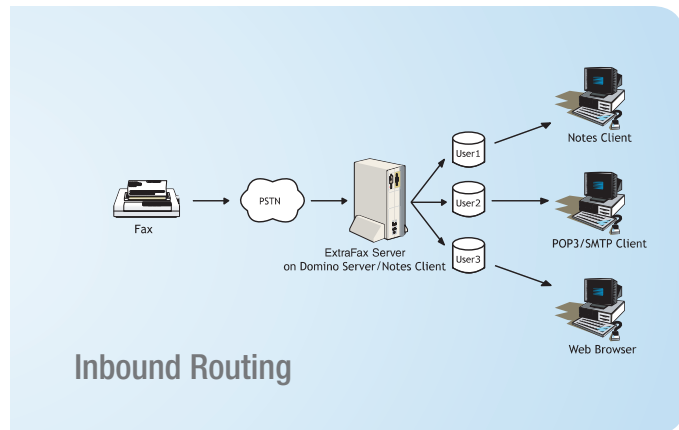

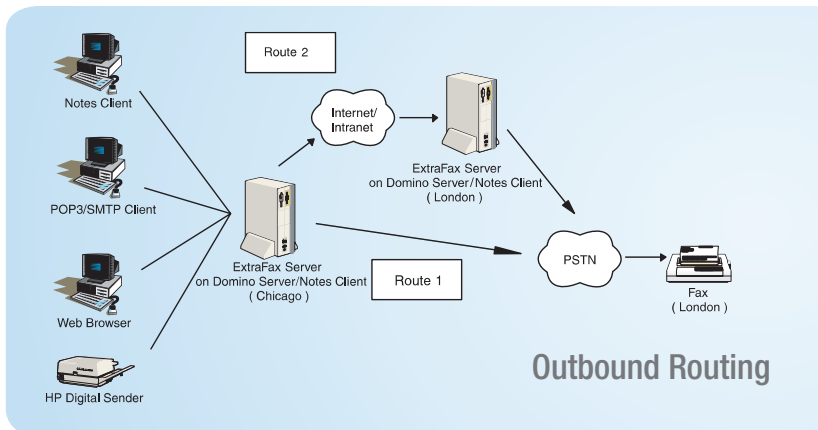

Improved Reporting
Now you can more easily distinguish between SMS/MMS/Fax jobs when creating reports and obtain graphical reports about line usage, how long jobs are sitting in queue and taking to process.

iNotes Integration
Ability to incorporate the Fax Options and Fax Address button in the iNotes web mail interface.

Support for Windows 2008 & 2012
Natively install and run ExtraFax on Windows 2008/2012.

Outbound Routing

Inbound Routing
